EDUCATION

BE-IT

Technological University (Hmaw Bi)

2011 - 2019

SKILLS

- HTML
- CSS
- Bootstrap
- Ajax
- jQuery
- Javascript
- TypeScript
- PHP
- Larvavel
- ReactJS
- NextJS
- VueJS
- Tailwind CSS

PROFILE INFO

I have over 5 years of experience building responsive web applications. Skilled in HTML, CSS, Bootstrap, JavaScript, TypeScript, ReactJS, NextJS, VueJS, PHP (Laravel Framework), and popular libraries like Tailwind CSS, Material UI, and Chakra UI. Passionate about clean, maintainable, and reusable code, and creating user experiences and collaboration with cross-functional teams to deliver high-quality products. I particularly relish the challenge of debugging and resolving errors.

WORK EXPERIENCE

Frontend Developer   April 204 - Now

Infinity Informations & App Dev Co.,Ltd
BKK1, Phnom Penh, Cambodia.

Developed and maintained multiple client-facing web applications with ReactJS, NextJS, VueJS, JavaScript, and TypeScript:
- Built reusable UI component libraries.
- Converted complex Figma designs into pixel-perfect and responsive UIs using Tailwind CSS, Material UI, and Bootstrap.
- Collaborated with the Backend team to integrate RESTful APIs.
- Collaborated closely with product managers, UX designers, and Testers to deliver high-quality features.
- Optimized web performance, reducing bundle size and improving Lighthouse scores.
- Integrated third-party libraries (Web Socket, Chat Woot, and Live Chat) to extend functionality.

Effectively oversee and engage with clients, both from private enterprises and government entities, to address their business requirements by delivering tailored IT solutions. Development of applications, websites, and CMS catering to the diverse needs of our clients.

PROJECT HISTORY

Electronic Document Management System
Used Languages :
- HTML, CSS, Bootstrap, Javascript, AJAX, jQuery, Laravel
- This project facilitates online document transfers instead of manual office transfers.
- Users can send, view, sign if needed, and delete their documents within the system.

TeleHealth
Used Languages :
- Laravel and ReactJS
- This admin portal is for an online healthcare center with three main parts: admin, doctor, and laboratory.
- The admin manages patient, doctor, and laboratory creation, reviews and approves/rejects registration forms, oversees doctor appointments, checks payment results, and transfers payments to doctors.
- Doctors can schedule appointments, indicate their online status, consult with patients via phone or video calls, and refer patients to the laboratory for medical checkups.
- The laboratory receives and checks medical lists, processes results, and retransfers them to doctors. The project integrates Dinger, a third-party system.

Internet Service Provider
Used Languages :
- HTML, CSS, Bootstrap, AJAX, jQuery, Laravel
- This project serves as a platform for an internet service provider company, comprising admin, clients, and service team members.
- The admin handles client registrations, verifies bill payments, approves service team requests, and manages client appointments, including approvals and rejections.

Web Developer   Sep 2019 - Sep 2020

Micro Service Myanmar Co.,Ltd | Software House

Yangon Zay (Website)
Used Languages :
- HTML, CSS, Bootstrap, Javascript, AJAX, jQuery, Laravel
- I built an API under the guidance of my lead developer for an e-commerce website focused on selling groceries.
- The functionalities include browsing products, managing the shopping cart (adding/removing items), marking favorites, and calculating items.
